

The screenshot shows the EAST software interface. At the top is a menu bar (File, View, Edit, Tools, Window, Help) and a toolbar. Below the menu bar are three tabs: Drafts, Pending, and Active. The Active tab is selected, displaying a list of search results:

- L1: (7) ("5822268"|"5949732"|"5978281"|"6038634"|"608
- L2: (1) memory same synchronous same (input near3 (u
- L3: (2) (memory same synchronous same (input near3 (l
- L4: (2) (memory same synchronous same (input near3 (r
- L5: (108) memory same synchronous same (input near3
- L6: (38) 5 and ddr

To the right of the list is a panel with fields for DBs (US-PGPUB; USPAT; EPO; JPO), Default operator (OR), and checkboxes for Plurals and Highlight all hit terms initially. Below this is a large text area.

At the bottom of the interface is a table with columns Type, L#, Hrs, Search Text, and DBs. It contains six rows of search results:
